

The Department of Chemistry at Virginia Commonwealth University invites applications for two tenure-eligible positions, one at the Assistant Professor level and one at a senior level, in the broad area of Nanoscience and Nanomaterials Chemistry to begin in Fall 2011, contingent upon funding. All areas of Nanoscience research will be considered, especially areas related to energy, sensors, devices and catalysis. Both positions are expected to develop and maintain funded, nationally recognized research programs, but the successful candidate at the senior level should have a substantial, established record of publication and external funding. Teaching will be in undergraduate and graduate courses in chemistry and nanoscience. A Ph.D. in chemistry or related field is required. The candidates' research interests should complement those of existing faculty and contribute to a new, interdisciplinary Ph.D. program in Nanoscience and Nanotechnology. Demonstrated experience working in and fostering a diverse faculty, staff, and student environment or commitment to do so as a faculty member at VCU is required. A curriculum vitae, a description of proposed research, an estimate of start-up costs, a statement of teaching interests, and three letters of recommendation should be sent to: Professor M. Samy El-Shall, Chair of the Nanoscience Search Committee, Department of Chemistry, P. O. Box 842006, Virginia Commonwealth University, Richmond, VA 23284-2006. Review of applications will begin immediately. *Virginia Commonwealth University is an equal opportunity/affirmative action employer. Women, minorities and persons with disabilities are encouraged to apply.*
